

PROJECT *Update*

Issue No. 6 - May 2022

Phase 2B: Arden Service Area Pipe and Meter Installation Project

Project Updates

Teichert has completed water main, service crossovers, and ADA ramp installations for the entire Project. Last month, final street restoration was completed in Area A and B. Beginning the week of May 16th, street restoration will occur in Area C, D and E, getting us closer to Project completion (see map attached).

Teichert will continue to place “No Parking” barricades on impacted streets ahead of street restoration work. **If you plan on using your vehicle and live on a road that will be closed for paving, please consider parking outside of the road closures marked by these barricades. Roads should reopen at the end of the work day when it is safe to drive and cones have been removed. Please refrain from driving on the road until crews have reopened road closures to help reduce any tire marks on the newly paved road.** We appreciate your patience and cooperation as we work to improve the water distribution system in your area.
