

PROJECT *Update*

Issue No. 2 - September 2021

Phase 2B: Arden Service Area Pipe and Meter Installation Project

Project Updates

As of September 7th, Teichert has completed all of the potholing work within Phase A and B and continuing in Phase C, D and E (see map attached). Water main and service installations will be completed in the same Phasing sequence set by the Contractor.

In late September, Teichert is expected to begin water main and fire hydrant installation in Phase A of the Project. During this time existing fire hydrants will remain in place until the new fire hydrants are installed, tested, and tied into the existing system.

As construction activities pick up, if work is expected along your street, Teichert will place a door hanger a few days prior to the start of the work. Once notified, please use this time to plan your ingress and egress accordingly, and look out for “No Parking” signs and closed sidewalks. Additionally, remember to stay clear of the work area as proper protective equipment is necessary for safety.

Project Summary

- Begin Construction – July 2021
- Work Completed: Layout of mainline trench, pothole of mainline and service connections in Phase A and B
- Work Remaining: Pothole of mainline and service connections in Phase C, D and E, water main installation, fire hydrant installation, service connection installation, test and tie-in new system, remove and/or replace fire hydrants, water main abandonment, curb ramp installation, street restoration
- End Construction – Expected June 2022
